

### 1. MAKE ROOM FOR NATURE

---

A strategic social economic concept which leverages higher densities in designated development areas to allow for a wider expansion of nature in others. A robust and continuous stretch of nature that strengthens biodiversity, gives access to the water and can be used in everyday life.

### 2. CREATE TWO WATER SPACES

---

A strategic landscape development concept which establishes two distinctive 'blue spaces': A green nature belt along the Gudenåen river, and an active and urban water space around the northern harbour basin. In this way, a wider range of interactions with the water are enabled.

### 3. CLIMATE RIBBON AS A BASIS FOR URBAN DEVELOPMENT

---

flood protection is not a challenge, it is a win for Randers. With the Climate Ribbon as the backbone, the city's future developments and urban spaces will be integrated with CCA which also increases the quality of life. In this way, the city's climate challenges are turned into a urban advantage - a gain for both investors and citizens.
