Majken Kalhave

Majken Kalhave is the Executive Director of Creative Denmark. Established in 2020, Creative Denmark is a not-for-profit, public-private partnership that creates awareness about Danish creative strongholds internationally. The aim is to foster relations between international stakeholders and Danish solutions, products, and competencies across the creative industries.

With over a decade of experience from Creative Denmark's sister consortium, State of Green, Majken Kalhave has in-depth knowledge about international branding and building international public-private partnerships and relations within primarily urban development and sustainable solutions.

Since the establishment of Creative Denmark in 2020, she has gathered an advisory board of key players within the creative industries to pinpoint the narrative of the Danish creative DNA that guides the organisation and shapes the partnerships.
