

Q40 WORK DESK

Q40 WORK DESK:

The Q40 work desk was designed by HOLMRIS B8 in 2015. The style of this desk is very contemporary and timeless, which combined with the many functional elements makes for an elegant and useful desk that complements any office landscape. The desk is height-adjustable and has a cable run to hide cords with the option of installing a cord organizer in the tabletop to make chargers easily accessible.

The advantage of this desk is that it can be used to create work “islands” without taking up too much space. To ensure that there is still room to focus, you can add Holmris SmartScreens with different graphic motifs.

The Q40 work desk is also available as Q40 split, which has a split tabletop that makes it possible to easily and elegantly hide cords within the desk, such as chargers or lamp cords.

It should be noted that the frame of the table includes two workstations, so you must order two tabletops.

- Desk tops in linoleum, NanoSoft-laminate, laminate, veneer and Resistant. Depth 23 mm
