

GENESE CONFERENCE

Description

In collaboration with the Danish design-duo Voss & Hedlund, HOLMRIS has designed and produced this elegant and iconic GENESE conference table. It was designed with Scandinavian minimalism in focus, which is expressed in the sleek, light surface and the slender base with its slightly curved shape.

The GENESE conference table is produced in different shapes and sizes to ensure great variety. Unlike most conference tables, this one is height adjustable, which allows for many different options with its use.
