

HOLMRIS B8

RAY@WORK

Design: Hans Thyge & Co. & Perch

RAY@WORK

RAY@WORK is light, simple and easy to use in many work and occasional environments. Enjoy this chair in classrooms, labs, your home office, or even around a dining table.

This is a refined and stylish chair, which pays homage to the ageless swivel-chair archetype.

The patented ergonomic seat promotes excellent perching posture, full body movement and increased blood flow, while enabling you to sit in a neutral balance.

The backrest gently rotates to facilitate a comfortable connection with your back, at your desired angle.

If you are passionate about beautiful design, or just want a truly ergonomic chair, RAY@WORK is perfect for you.

Design: Perch

Perch designs and researches for healthy human movement. Based in Dublin, Ireland, we specialise in deep research and partner with international leaders to bring new, innovative and truly beautiful products to life. We design high and low tech solutions to improve the meaning and pleasure of workers, learners and individuals.

Design: Hans Thyge & Co.

Hans Thyge & Co. is a progressive design and concept development company owned by Hans Thyge and two partners. The studio works for both Danish and international customers-primarily in the furniture business. In addition to furniture design they also work with industrial design, concept design, exhibition design, animations and lectures.

The company has received many awards and has been published worldwide. Hans Thyge & Co. has developed a series of very successful ergonomic chairs for Labofa.
