Product

The essence of this lounge group is all about its organic shape and the harmonious blend of materials: Tactile rope, smooth aluminium, warm teak, and soft fabric. Though the details are understated, they lend a distinct and exquisite touch to the lounge group. The loose back cushions send an inviting vibe as does the ample daybed of the series. The mindo 107 collection transforms any outdoor terrace into a new green living room, blurring the boundaries between indoor and outdoor furniture.

Designed by

Rikke Frost, an industrial designer has run her design studio since 2004. When designing, Rikke focuses on the relevance and longevity of a product and its impact on our environment, both now and in the future. Rikke's designs for mindo are minimal without ever losing comfort, functionality, or aesthetic magic. Her furniture has a playful quality to it, which she emphasizes with thoughtful details for the user to discover and engage with.

"On a visit to Italy with mindo, I learned about this rope material, the weaving and twisting techniques. To put focus on this craft, I designed a lounge group that embodies the unique qualities of rope – its texture, strength and versatility. I set out to emphasize the interplay of various materials to each other: the warmth of teak with the sleek aluminium, blending organic shapes with geometric precision."

Dimensions

3-seater sofa
Length: 232,2 cm / 91.4"
Height: 66,5 cm / 26.2"
Depth: 88,2 cm / 34.7"
Seat height: 42,5 cm / 16.7"

Side table
Diameter: 57,3 cm / 22.6"
Height: 46,0 cm / 18.1"

Daybed
Length: 150,0 cm / 59.1"
Height: 76,0 cm / 29.9"
Depth: 155,0 cm / 61.0"
Seat height: 42,5 cm / 16.7"

Footstool
Diameter: 71,3 cm / 28.1"
Seat height: 40,0 cm / 15.7"

Lounge chair
Length: 95,0 cm / 37.4"
Height: 66,5 cm / 26.2"
Depth: 77,8 cm / 30.6"
Seat height: 42,5 cm / 16.7"

Coffee table
Length: 126,0 cm / 49.6"
Width: 53,0 cm / 20.9"
Height: 38,5 cm / 15.2"

Colours

FABRIC:
Sunbrella Sooty

ROPE:
Beige Brown
013

FRAME:
Teak

ALU FRAME:
Dark Grey 070

Rope

Fabric (Sunbrella)
Ceramic

Care & Maintenance

ALUMINIUM is a lightweight, yet strong and durable material and ideal for outdoor furniture due to its resistance to corrosion. All our aluminium undergoes a high-quality, solvent-free powder coating for extra protection before being processed. If the coating is damaged due to dents or scratching, moisture can invade and eventually damage the aluminium. Regularly remove dirt with a sponge or soft brush, lukewarm water, and a mild dishwashing detergent. Never use solvents. Thoroughly rinse with clean, fresh water after cleaning to remove all soap and dirt residue.

TEAK is a hardwood well suited for outdoor use, whether oiled or left untreated. All the teak used has not been treated and will acquire a grey patina over time. If the warm look of the teak is to be maintained, oiling with a suitable teak oil will be necessary before taking the furniture into use. The frequency required for such treatment depends on the climate the furniture is exposed to. Teak is a natural material; therefore, minor cracks and slight warping of the slats may be expected and are not a sign of inferior quality. Teak is easy to maintain as daily cleaning is simply brushing off loose dirt. Spills should be taken quickly, especially if the teak has not been treated. A mild dishwashing detergent and a soft brush or sponge in the direction of the grain will usually suffice. Always rinse the area well to remove any soap residue. Tougher stains might require light sanding. If treated previously, the treatment must be repeated after sanding the area. The teak slats can be removed and individually replaced if necessary.

ROPE is made from 100% solution-dyed Olyna fibers. Olyna fibers offer great, long-lived resistance to sunlight, dirt, chlorine, and sunscreen lotion due to a spinning process that adds special UV protection and antioxidants to the fabric. This high-quality material offers an unusually soft, "wool-like" surface, which is very comfortable and has strong anti-allergenic properties. We recommend frequent vacuuming or brushing off dirt/dust to avoid stains or mildew. Most dirt and stains can be cleaned off if treated promptly. The fabric can be washed with lukewarm, soapy water (<30°C/90°F). A soft bristle brush is advisable. Do not dry in electric or gas dryers, and avoid ironing the fabric. Excessive heat will shrink the fabric, we recommend air or line drying.

The **FABRIC (SUNBRELLA)** is made from high-quality, 100% solution-dyed acrylic fibers produced in France. Sunbrella is designed for outdoor use and comes with a repellent surface that is hydrophobic and delays the adhesion of stains and dirt. This effect will decrease over time depending on the climatic impact. Clean with a soft bristle brush and lukewarm water/mild soapy water. Air drying is recommended to prevent mildew. We propose cleaning the cushions regularly depending on the climate; stains and dirt should be removed swiftly after they are discovered. Do not steam-iron the fabric; only use a dry iron on the lowest temperature setting, e.g., through a cloth. It is advisable to test a small area first.

CERAMIC tabletops are extremely strong and almost maintenance-free, therefore ideal for outdoor use. Ceramic is made from natural and recycled raw materials. Small variations might occur on the surface which has no effect on the quantity of the product. Daily cleaning is done with a soft cloth and lukewarm water. For heavier staining, use a neutral or alkaline cleaner (never acid-based). Always rinse well after cleaning to remove all soap and dirt residue.

Storage

The lounge group can be left outside during the entire summer season. During the off-season, we recommend storing your furniture in a dry and ventilated place, like a covered patio or similar. This will give your furniture maximum protection and make spring cleaning easier. Alternatively, store it under a furniture cover. A cover should be placed in such a manner that it is kept slightly away from the furniture to minimise condensation and allow for free air circulation. Condensation forming under the cover during storage, as well as furniture or cushions that were damp before storage, can cause mould and mildew. Therefore it is vital that the furniture as well as any cushions are completely dry before storage. Checking the stored furniture regularly and letting moisture escape by lifting the cover on dry days is helpful. We recommend storing any loose cushions upright or in a slanted position for maximum air circulation. Placing them with their backside up will protect the more visible parts if staining should occur.

Cover

mindo 107 lounge chair: Cover no. 1
