Product

The designers were given a clear task - to bring innovation and sustainability into a classic category. The result is our mindo 120 serving trolley, whose design enables the product to be transported in a flatpack and thus indirectly contributes to climate protection. The trolley is made of specially-made aluminium sheets with practical holes that drain rainwater. An organic shaped profile forms the frame and handle, and the large wheels make it easy to move around the patio or between outdoors and indoors.

Designed by

The Valencia-based design agency Odosdesign, namely Ana Segovia and Luis Calabuig, are dedicated to integrating creativity and communication in product design. In their collaboration with mindo, their success lies in the ability to understand and translate our vision into furniture that truly embodies our initial ideas. By emphasizing the core element of each creation and placing focus on comfort and usability, their iconic designs accurately convey our mindo mindset.

"A classic product, but taken to the next level. Innovated because the trolley can be completely disassembled. And sustainable because it is packaged and cargo freighted in a flat pack, saving space and thus emission."

Dimensions

Trolley
Length: 98,6 cm / 38.8"
Width: 61,7 cm / 24.2"
Height: 80,5 cm / 31.7"

Colours

ALU FRAME:
Light Grey 010

ALU FRAME:
Dark Green 014

ALU FRAME:
Dark Grey 070

Materials

Powder-coated aluminium

Care & Maintenance

ALUMINIUM is a lightweight, yet strong and durable material and ideal for outdoor furniture due to its resistance to corrosion. All our aluminium undergoes a high-quality, solvent-free powder coating for extra protection before being processed. If the coating is damaged due to dents or scratching, moisture can invade and eventually damage the aluminium. Regularly remove dirt with a sponge or soft brush, lukewarm water, and a mild dishwashing detergent. Never use solvents. Thoroughly rinse with clean, fresh water after cleaning to remove all soap and dirt residue.

Storage

The mindo 120 trolley can be left outside during the entire summer season. During the off-season, we recommend storing the trolley in a dry and ventilated place, like a covered patio or similar. Taking the trolley inside and using it in the kitchen or dining area is also an option. Alternatively, store the furniture under a furniture cover. A cover should be placed in such a manner that it is kept slightly away from the furniture to minimise condensation and allow for free air circulation. Condensation forming under the cover during storage, as well as furniture or cushions that were damp before storage, can cause mould and mildew. Therefore it is vital that the furniture as well as any cushions are completely dry before storage. Checking the stored furniture regularly and letting moisture escape by lifting the cover on dry days is helpful. We recommend storing any loose cushions upright or in a slanted position for maximum air circulation. Placing them with their backside up will protect the more visible parts if staining should occur.

Cover

There is no corresponding cover for the mindo 120 trolley.
