Easy, Adaptable & Comfortable

The desire to create a modern and sustainable chair for small outdoor spaces gave birth to our mindo 121 folding chair. A folding chair embodies the concept of minimal volume, both in shipping as well as when storing at home. The seat and back slats' bamboo stems from certified forests; bamboo is a fast-growing grass species recognized for its robust and sustainable qualities. The mindo 121 folding chair is a perfect companion where there's a focus on space and sustainability.
