Montering af vinterprop

Vinterproppen monteres fra indersiden i poolen – i det runde returløb, hvor det rensede vand kommer tilbage i poolen.

Skrue omløber, kugle og inderskål ud på indersiden (se ovenfor). Nu er du inde ved gevindet, der passer til vinterproppen.

Vinterklargøring iøvrigt

Som minimum skal alt eksternt tilbehør afmonteres og tømmes for vand. Opbevar det frostfrit vinteren over. Specielle instruktioner vedrørende vinterklargøring vil fremgå af de enkelte deles individuelle manualer.

Alle manualerne kan findes på **swim-fun.com/Download**, hvis du ikke har de trykte manualer længere.

Mounting of winter plug

Install the winter plug from the inside of the pool - in the round return inlet where the purified water are returned to the pool.

Unscrew the circumference, ball and inner bowl on the inside (see above). Now you're at the thread that fits the winter plug.

Other Winter Preparations

Removed and empty all external accessories and store them frost free during winter. The manuals for the individual parts will include special instructions for winter preparation.

All manuals can be found on **swim-fun.com/Download** if you are no longer in possession of the printed manuals.
