

The image shows a Swim & Fun ClearWater Pro 1002 Samling pump and filter unit. It consists of a large, grey, cylindrical filter housing with a white top lid. A black flexible hose is connected to the top of the filter. The pump motor is mounted on a black base at the bottom right of the filter housing. The pump has a black casing and a silver-colored motor. A black flexible hose is also connected to the pump. The unit is shown against a white background.
